

Assembly Instructions

Building a unit(s) with a Wall Attachment.

SHELFSTORE®

www.shelfstore.co.uk
www.shelvingsystem.co.uk

Tools Required

Philips Screwdriver, Drill, Spirit Level

Read all instructions before starting

Step 1

Stand one upright against the wall. Place a wall attachment on the top (for tall Uprights) low uprights place on the side.

Mark the wall as shown opposite.

Wall brackets can be fixed in two positions (see step 3).

Notes:

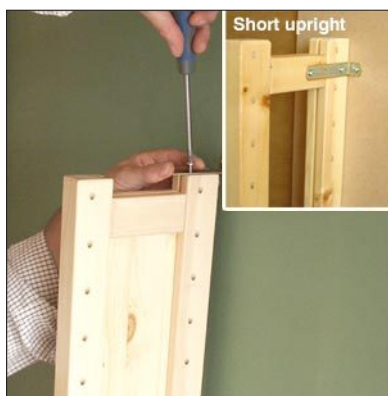

If using an **outer upright(s)** ensure it is facing the correct way before securing the wall attachment.

If using an **infill(s)** slide it into the upright before starting to assemble.

Step 2

Fix the wall bracket to the wall

Step 3

Using a level ensure the upright is vertical.

Fix the wall attachment to the upright.

Step 4

Starting at the bottom insert the shelving.

When your unit(s) is complete secure the remaining upright(s).

Tips for a neater finish:

Do not use shelf supports for the top and bottom shelves.

For tall uprights, position the top shelf upside down.
